## What makes Server World better:

Server World's Telehousing Services located in Osborne Park, provides a reliable and secure environment for your mission-critical equipment. We currently provide facilities for approximately 2500RU equipment..

Through its Telehousing service, Server World can facilitate a reliable and protected connection to its National and International services, allowing you to interconnect to other carriers inside our Data Center, in which case we will take care of the interconnection. Our service is designed to support your equipment at convenient points of presence (PoPs) either as an infrastructure enabler, a bundled service or a stand-alone product.

Server World's solutions are flexible, scalable and cost-effective. You can benefit from our world-class telehousing services; high-speed connectivity and value added services.

When you have the flexibility of installing your data/communications equipment in a secure and controlled facility, you're free to focus on your core business, knowing all your communications needs are taken care of.

### Key attributes:

- \* Located in Osborne Park which provides free parking, easy access and close to all major facilities.
- \* Advanced accommodation coupled with effective, flexible power and cooling solutions.
- \* State-of-the-art facilities, deploying the latest security systems.
- \* Neutral Business Environment - providing flexible choice of network connectivity
- \* Maximum reliability - 24x7 single point of contact - provided by proactive monitoring and dedicated technical experts available to provide service and support.

### Benefits overview:

- ★ No Capital Expenditure
- ★ Reliable Data Center
- ★ Overall Maintenance
- ★ Fiber Backbone
- ★ Online Support Services
- ★ Free up internal resources

+ much much more
